

## **PATIENT TESTIMONIALS**

### **PHYSICAL THERAPY**

“GIGI really was a lot of help in assisting me with my therapy.”

I only had 3 appointments with Julie and must say I’ve got a new friend who cares and will not let me control my situation because it’s not for her, it’s for my own good and she will work with me as long as I work hard, she motivates me where no one else could. I thank her for her friendship and confidence in me.

### **LUMBAR FACET INJECTION**

“I finished my first set of facet injections and my back is doing fine now...and I believe my injections have done me well. I would like to say thank you to the staff and a very special thank you to Dr. Pamela Thomas-King.”

### **CLINIC OVERALL**

The Pain Management & Treatment Center is a clinic where I can always say they have patience, they always greet with a smile; hello’s and how are you doings. If I’m feeling sad when I come to the clinic, I leave those feelings outside because the place is too happy to bring any sadness in there. Aymie is wonderful. She makes you feel better about yourself. Her spirit is wonderful.

Dr. Pamela Thomas-King is very special. To be in her company is good because she explains things, plus she will let you know exactly what to expect. So, my hat goes off to PMTC for being interested in me and my situation. They make me feel I’m not doing this for “them”, but they all motivate me to do it for myself. I would like to say thanks very much for everything.
